

LOGNOTE -- Chief, Operations Group, 18 January 1984

2. (Baker) [] dropped by today to let us know of his continuing interest in an FBIS overseas assignment at some point in the future, despite his recent transfer of career service. He said that although family concerns necessitate his remaining in the States for a while he would still be interested in working for FBIS again when these are straightened out. I told Jim that present ED assignment projections put any such assignment out of the question until the summer of 1986 at the earliest but that he was free to keep in touch on the possibility that a need might arise. No commitment of any kind made on either side.
